

# Dinosaur Visors

## You will need

- Thin card
- Scissors
- Elastic – something like a large rubber band or some string
- Coloured pens, pencils, any other decorations you like

1. Print the template on to some thin card.
2. Decorate your visor. You can get really creative with colours, patterns, pompoms or stickers. Don't forget to give your visor some eyes.
3. Cut out your visor, either with or with out teeth. How about varying how many teeth you cut out?
4. Fold down the teeth and fold up the eyes.
5. Staple a large elastic band to the 'X' on each side, or if you don't have one big enough punch a hole and thread some string through to tie behind your head.
