

Draw-a-saurus

Megaloceros

Sedgwick Museum
of Earth Sciences

Lightly sketch step 1, then add the pink lines from step 2 on top of step 1. Keep adding the pink lines from each step until you reach step 6. Draw firmly over your final lines then colour your giant deer.

Fact file:
 Name: Megaloceros
 Pronounced: meg-A-loss-er-us
 Meaning of name: Great horn
 Length: 2.8 metres
 Diet: Herbivore
 When it lived: Quaternary
 (400,000 - 9,500 years ago)

The antlers of the male skeleton in the Museum span 2.5m. Living deer use their antlers for fighting but in our skeleton they are in very good condition suggesting these antlers were not used this way.
