

Draw-a-saurus Ichthyosaur

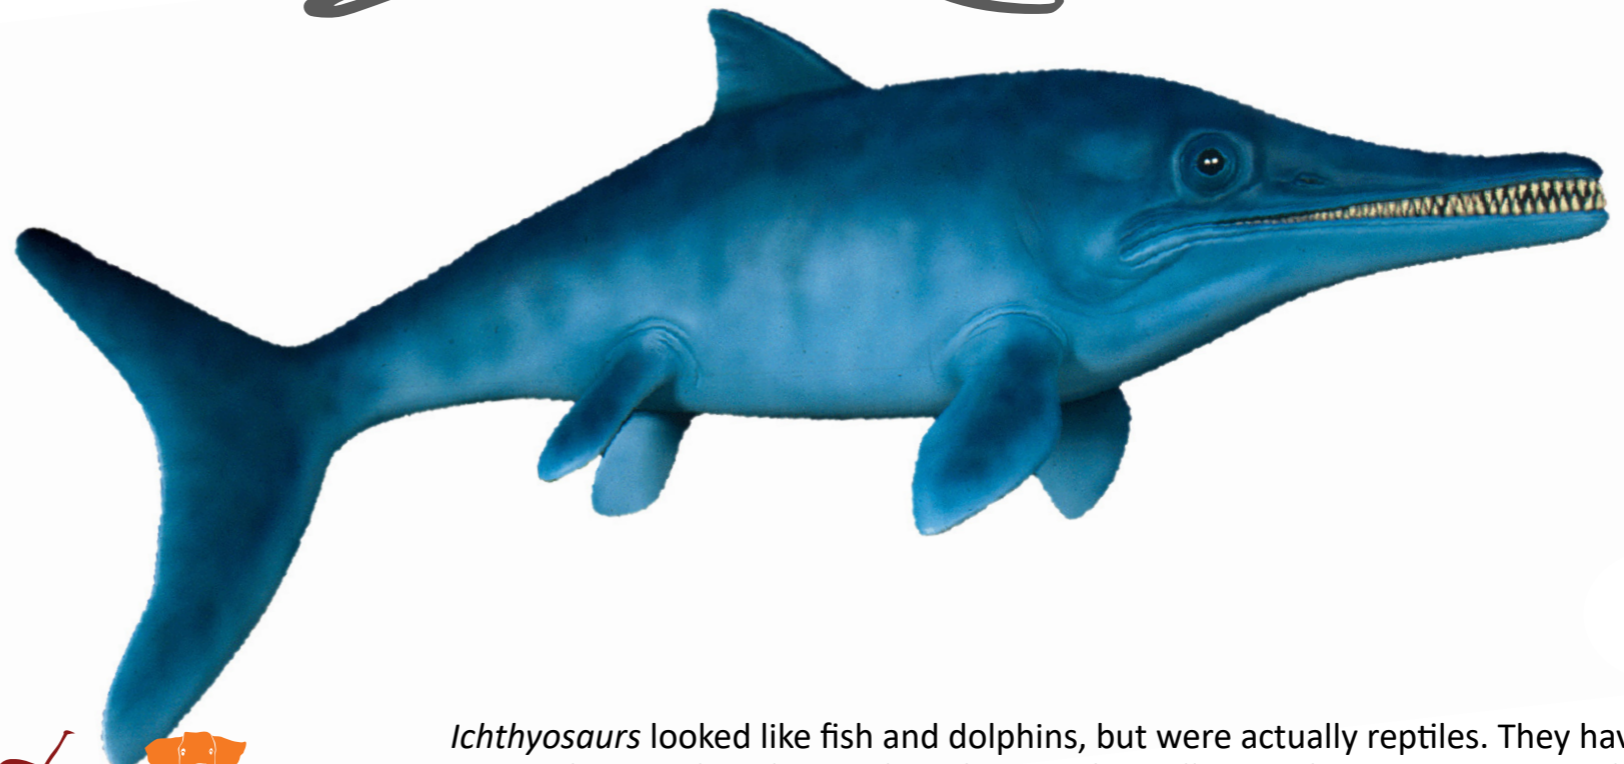

Sedgwick Museum
of Earth Sciences

Lightly sketch step 1, then add the pink lines from step 2 on top of step 1. Keep adding the pink lines from each step until you reach step 5. Draw firmly over your final lines then colour your reptile.

Fact file:
Name: Ichthyosaurus
Pronounced: IK-theo-sore-us
Meaning of name: Fish lizard
Length: 1 - 6 metres
Diet: Carnivorous
When it lived: Triassic - Cretaceous
(250-90 million years ago)

Ichthyosaurs looked like fish and dolphins, but were actually reptiles. They have a long snout, short neck and conical teeth to catch small prey. Their eyes were very large, probably for deep diving. *Ichthyosaurs* breathed air, gave birth to live young and were most likely warm-blooded.
