

CAMBRIDGE MUSEUM OF TECHNOLOGY

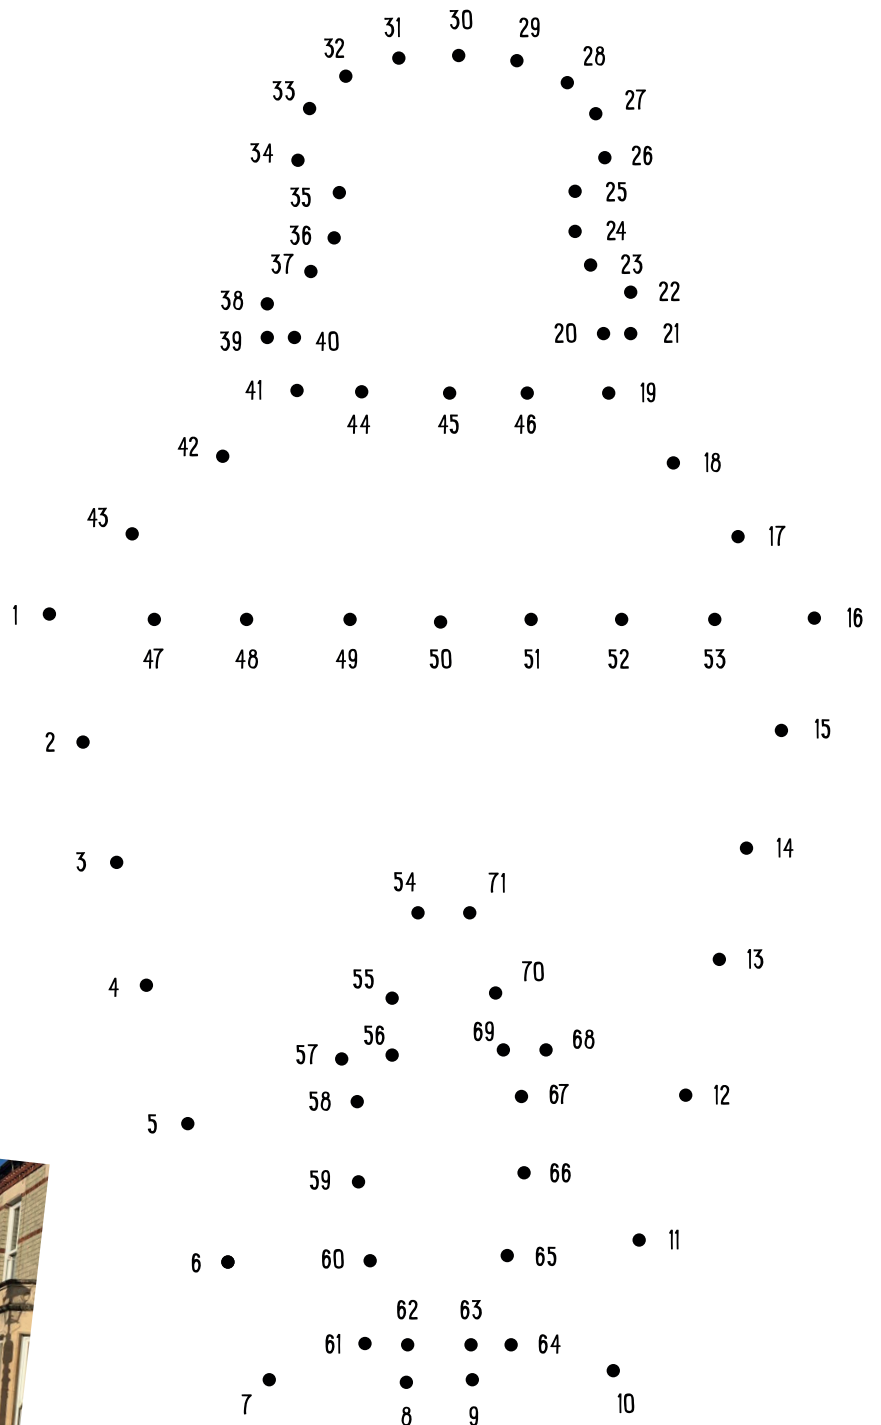

A DOTTY

challenge

SUMMER ~~AT~~ *with* THE MUSEUMS

Cambridge Museum of Technology is housed in a Victorian pumping station. You may have seen its tall chimney on the Cambridge riverside. It has lots of objects from local industries which show how people lived and worked in the past. Did you know that before we had electric street lights, our roads were lit by gas lights? Each one had to be lit every night by a person called a lamplighter. Join the dots to discover what a gas lamp looked like.

ANOTHER CHALLENGE!

You can still see some of these gas lights in streets and on buildings in our area. Next time you are out and about, look carefully to see if you can spot any.
